HEREFORDS

BROOKSBY
ANGUS

BULL SALE

**Wednesday 24th July 2019
at 11.30am
at "Brooksby" Bundarra**

In Memory of

Victor Moar

In October last year tragedy hit our good friend and agent, Victor Moar, while competing in his much loved sport, dog trialing.

Victor was an outstanding agent and a great friend to us and many others. He was very highly respected and an extremely hard worker with a personality that would light up any day with his positiveness and that great big smile. If you asked him how he was going, he would say 'I'm having a great day' and he never changed.

When we first moved to Abington, Victor used to have a chook auction in Armidale once a month where people came from all over the state to buy and sell. David at the time was seven years old and we had heard about Victor's chook sale so we decided to have the morning over in Armidale. David took a liking to a bantam with six chickens, with only \$8.00 to buy her he started vigorously bidding and Victor finally knocked her down to Dave for \$22.00. Needless to say, Steve had to cough up the rest. Victor's comment at the time was 'I can see I will be selling bullocks for this young fellow one day.'

Victor was heavily involved with the Armidale community and many of the young citizens. It is such a tragedy that his life was cut short. He has left great memories for many people and helped so many. He was a wonderful family man and friend and will be greatly missed.

GLENWARRAH HEREFORDS & BROOKSBY ANGUS

BULL SALE

28 Hereford Bulls

26 Angus Bulls

29 Yearling Angus Bulls

11.30 am

**Wednesday 24th July 2019
at "Brooksby" Bundarra**

SALE INFORMATION

GST:	GST is to be added onto the purchase price at the fall of the auctioneer's hammer. You will be invoiced purchased price plus GST.
REBATE:	2% rebate to outside Agents introducing buyers in writing 24 hours prior to the Sale.
TRANSPORT:	All transport to be co-ordinated through Peter Kratz Livestock Transport unless you have your own truck.
FREE DELIVERY:	Free delivery on the 2 year old bulls to major centres in NSW, QLD and Victoria.
CATTLE HEALTH:	All bulls were semen tested and are fully vaccinated with 7 in 1.
JOHNES:	We are accredited J-BAS 7.
INSPECTION:	Bulls may be inspected prior to the sale or on the morning of the sale.
INSURANCE:	We recommend bulls are insured against injury and death.
ACCOMMODATION:	Motels are situated in Armidale, Uralla and Inverell.
REFRESHMENTS:	Sale day refreshments will be supplied by The Grace Munro Ladies Auxillary.
DISCLAIMER:	The owners, employees, sale staff and representatives accept no liability for accidents that occur, although these are rare at cattle sales, any person attending does so at their own risk. While all care has been taken in the preparation of this sale catalogue, Glenwarrah principals accepts no responsibility for any errors or omissions contained in this publication.
CATALOGUES:	Catalogues can be viewed online at www.glenwarrah.com.au or the Breed Society websites.

New England
AIRSPREAD PTY LTD

AERIAL SPREADING OF FERTILIZER & SEED

New England Airspread Pty Ltd is a family owned and operated business based in Guyra, NSW. We conduct aerial topdressing throughout NSW and Queensland.

UNDERSTANDING EBVS

A BRIEF GUIDE TO BREEDPLAN

BREEDPLAN is a performance valuation program that describes the genetic profile or bulls for a number of commercially important traits. This profile is given as an Estimated Breeding Value (EBV), expressed as a figure (+/-) relative to the breed benchmark of zero (0) for each trait.

Accuracies - The accuracy provides a measure of the reliability of the EBV. The higher the value, the less likelihood of the EBV changing with the addition of more performance records on the animal.

Birth Weight - is based on the measured birth weight of animals, adjusted for dam age. The lower the value the lighter the calf at birth and the lower the likelihood of a difficult birth. This is particularly important when selecting sires for use over heifers.

200 Day Weight - is calculated from the weight of animals taken between 80 and 300 days of age. Values are adjusted to an animal's genetic merit for growth to early ages.

400 Day Weight - is calculated from the weight of progeny taken between 301 and 500 days of age, adjusted to 400 days and for age of dam. This EBV is the best single estimate of an animal's genetic merit for yearling weight.

600 Day Weight - is calculated from the weight of progeny taken between 501 and 900 days of age, adjusted to 600 days and for age of dam. This EBV is the best single estimate of an animal's genetic merit for growth beyond yearling age.

Milk - is an estimate of an animal's milking ability. For sires, this EBV is indicative of their daughter's milking ability as it affects the 200 day weight of their calves.

Scrotal Size - is calculated from the circumference of the scrotum taken between 300 and 700 days of age and adjusted to 400 days of age. This EBV is an estimate of an animal's genetic merit for scrotal size. There is also a small negative correlation with age of puberty in female progeny and therefore selection for increased scrotal size will result in reduced age at calving of female progeny.

EMA - estimates the genetic difference in carcase weight at a standard age of 650 days.

RIB - estimates the genetic differences in fat depth at the 12/13th rib in a 300kg dressed carcase. More positive EBVs indicate more subcutaneous fat and earlier maturity.

Rump - estimates the genetic differences in fat depth at the P8 site of a 300kg dressed carcase. More positive EBVs indicate more subcutaneous fat and earlier maturity.

IMF% - is an estimate of the genetic difference in the percentage of intra-muscular fat at the 12/13th rib site in a 300kg carcase. Depending on market targets, larger more positive values are generally more favourable.
